

PRESENTATION 2024

myGivmo was developed for everyone who believes in a good cause

Company Mission

Give More

Make it easy for anyone to raise funds for the cause of their choice, automatically, in the background, every minute their computer is on and running the myGivmo application and our patent pending workflow.

Our Vision

To revolutionize giving in the digital age

myGivmo is a Microsoft-trusted application that harnesses the power of distributed computing, employed by NASA, to generate passive income for a diverse range of beneficiaries.

Our vision is to **transform every computer into a powerful fundraising tool**, working around the clock to support charities, schools, organizations, clubs, churches, individuals, socially-conscious content creators, and more.

Imagine fundraising **akin to virtual can collecting** or a continuously filling piggy bank. The best part? It's all passive income, so no need for your supporters to open their wallets.

Our Founder

Russ Willey, Founder & CEO of myGivmo, drew inspiration from a groundbreaking UC Berkley project, called SETI@home, that used the power of distributed computing to explore extraterrestrial intelligence.

People from all over the globe participated by running a program on their home computers that processed data from radio telescopes. The collective efforts of those thousands of home computers were able to collect and analyze more data than one supercomputer.

Today, distributed computing helps work on complex problems, including mapping the human genome, by sharing the processing power of millions of different computers.

And you need only to download a small program that runs in the background of your computer to participate.

Our Beginnings

The Challenge

How to harness the power of distributed computing on behalf of worthwhile charitable organizations and causes around the world.

The Solution

Inspired by those early programs, Russ found a way to bring distributed computing to the charitable fundraising sector. His Microsoft-trusted myGivmo app transforms the ordinary computers of supporters into powerful fundraising tools, collectively generating passive income on behalf of a cause around the clock. Collecting pennies every minute a machine is on!

Causes we Support

myGivmo unlocks the power of passive fundraising for
ALL types of beneficiaries

Schools

Churches

Non-profits

Businesses

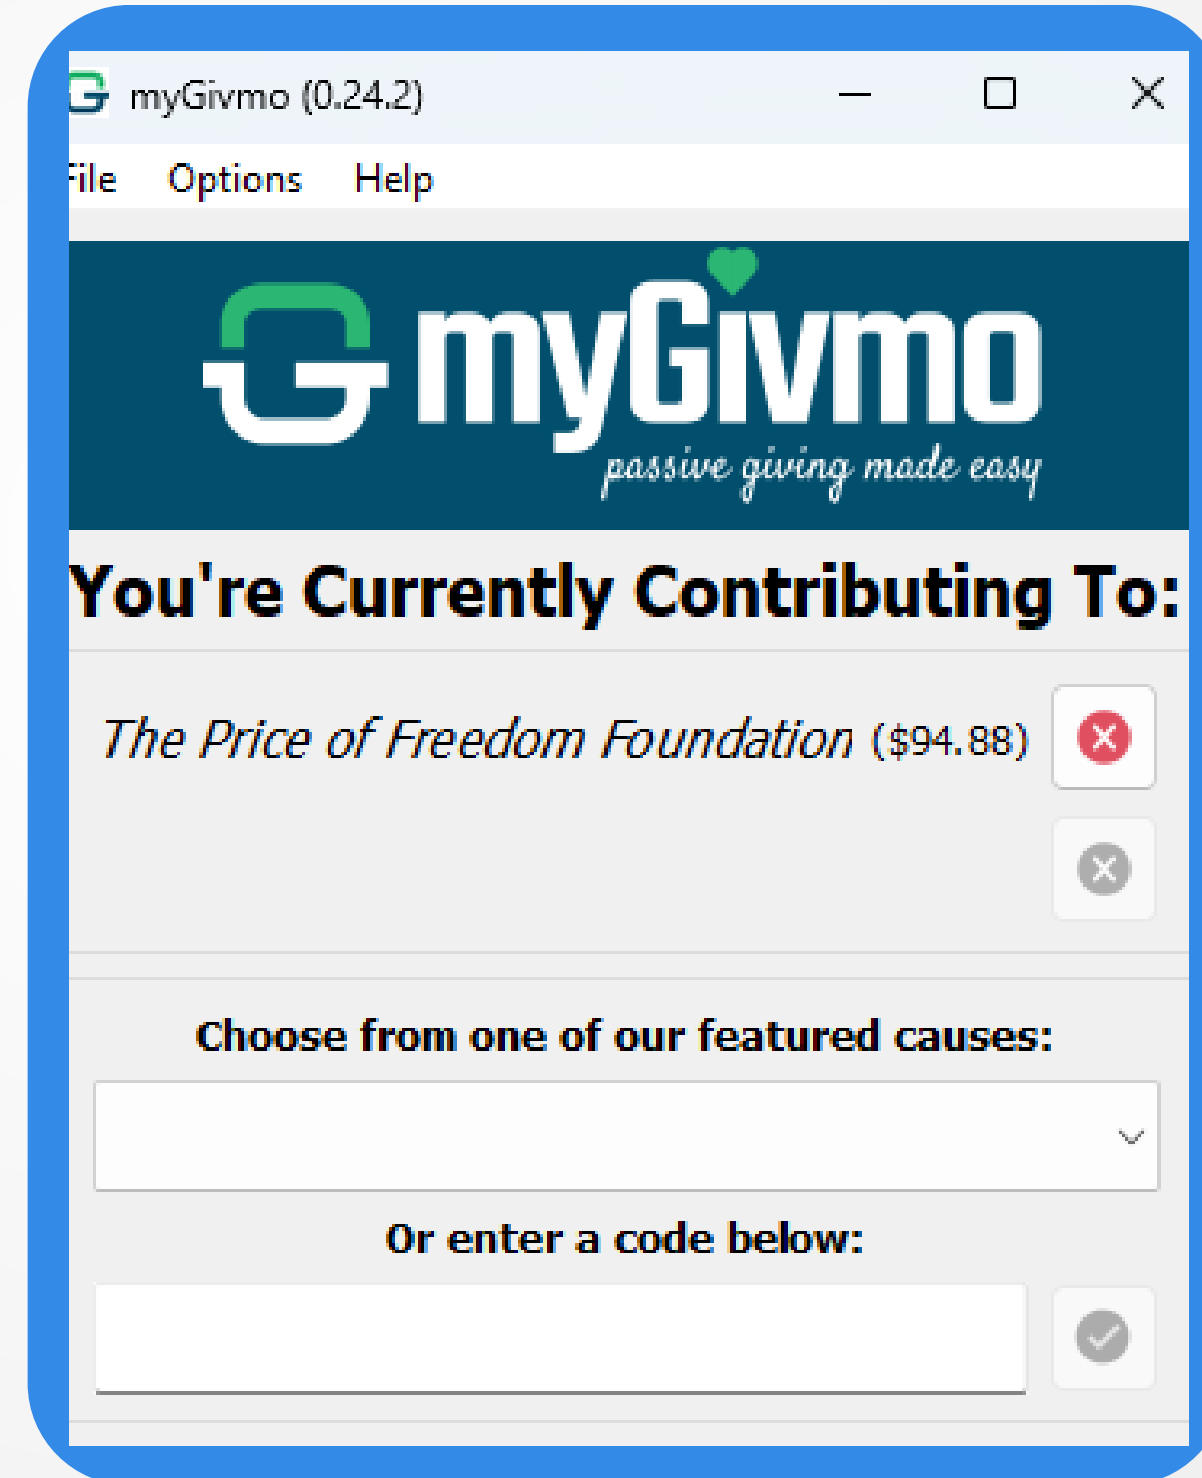

Individuals

How it Works

It's as easy as downloading and installing the app, then entering the unique code for your chosen cause. It takes just 5 minutes and once you set it, you can forget it.

The app utilizes computer processing power to verify blockchain transactions.

How is income generated?

It's actually quite simple. myGivmo is acting as the VISA in a decentralized system, verifying transactions and keeping a small percentage for its proof of work.

Application Workflow

01

Users Download and Install App

Supporters download and install the Microsoft-trusted myGivmo app on their laptop or desktop computer.

02

Users Select a Cause

Users select a cause to support from one of our featured causes, or by entering a specific code for the cause or causes (up to two) they want to raise funds for.

03

App Runs & Reports

Every minute a supporter's machine is on, myGivmo is hard at work in the background, verifying transactions, earning rewards, and reporting results to our secure server.

04

Income is Distributed

The rewards for verifying transactions add up and are tallied for each cause. At the end of each month, the total, collective rewards are paid and distributed to each cause.

Passive Income Potential

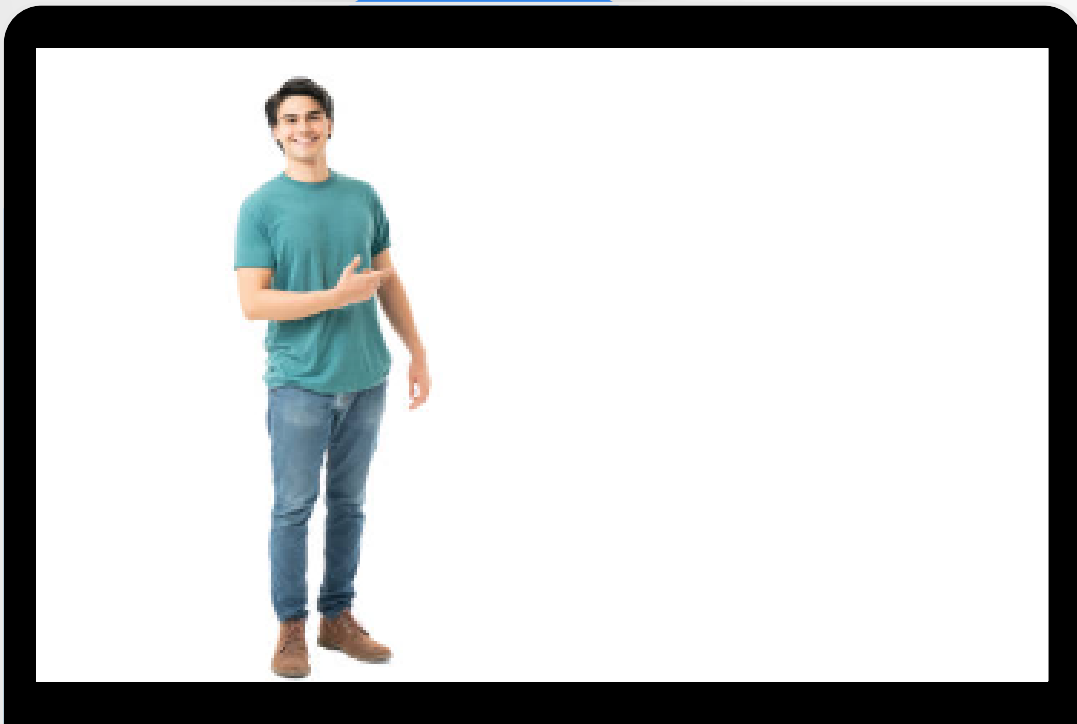

The average user generates between **\$10 to \$30 annually**, based on their computing power.

The more users running the app using your code, the more income is generated.

1 User

*1 user * \$10 to \$30*

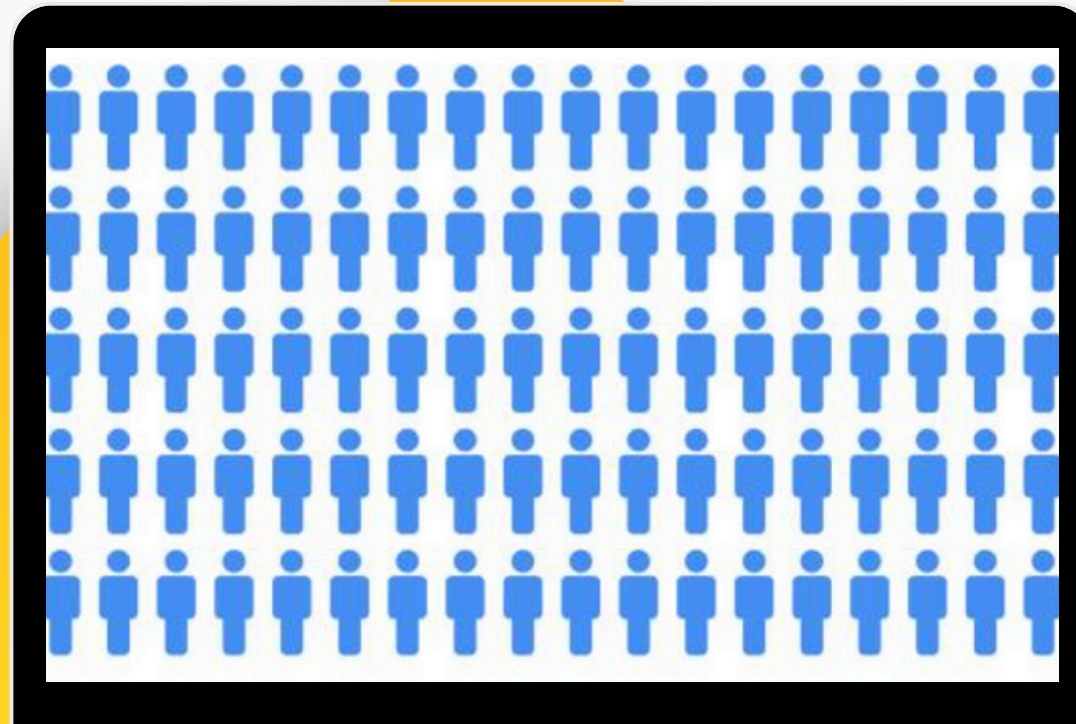

**\$10 to \$30
Annually**

100 Users

*100 users * \$10 to \$30*

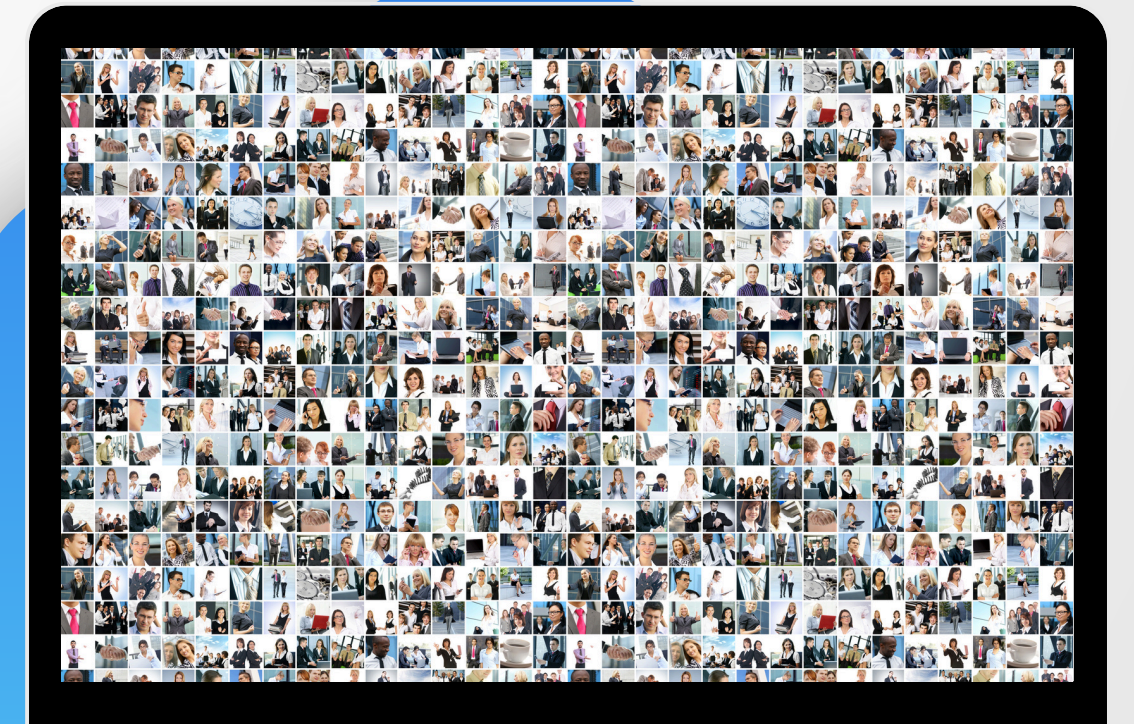

**\$1,000 to \$3,000
Annually**

1,000 Users

*1,000 users * \$10 to \$30*

**\$10,000 to \$30,000
Annually**

Safety and Security

It's our top priority.

1

myGivmo is a Microsoft-trusted publisher and the app runs seamlessly with Windows Defender, as well as all third-party anti-virus programs.

2

No personal information is ever collected collect from your browser or computer! It is designed with your privacy in mind and is completely anonymous - ensuring that myGivmo will never access or store any of your data.

3

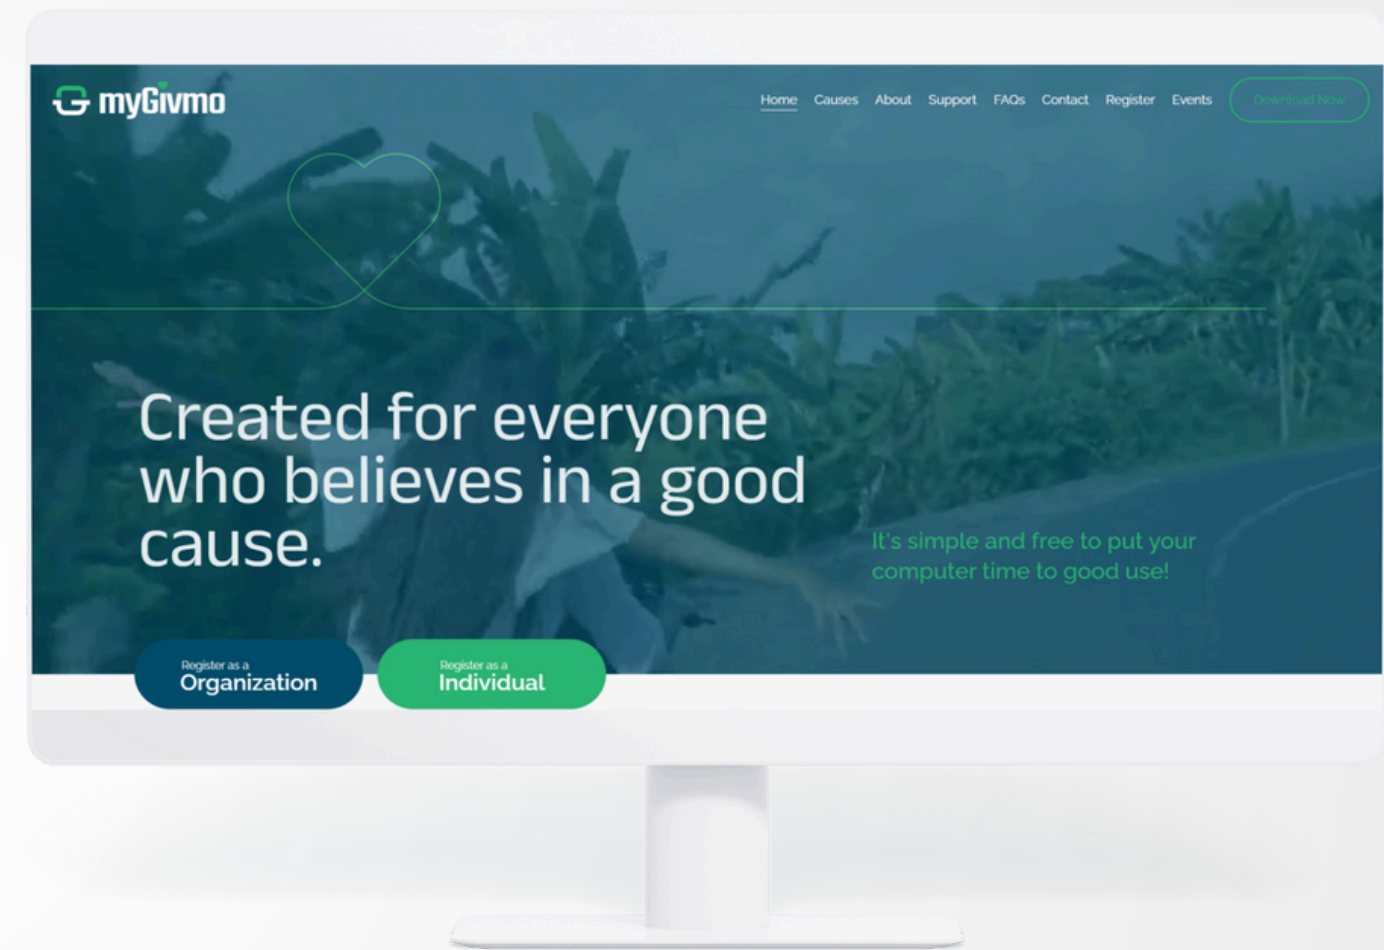

All company servers are securely hosted by Digital Oceans, a top name in technology and cloud services.

Next Steps

Unlock the power of passive fundraising for **YOUR** cause

Here's how:

Request to sign up your cause

Choose a unique code for your cause

Our team will add your cause to the myGimvo platform

myGimvo works with you to educate and encourage your supporters to run the app using your code

We send you a monthly check!

Key Points

Always free for causes and its supporters to use

Runs in the background and does not bog down system

Causes can be changed on the fly and up to two causes can be selected at one time

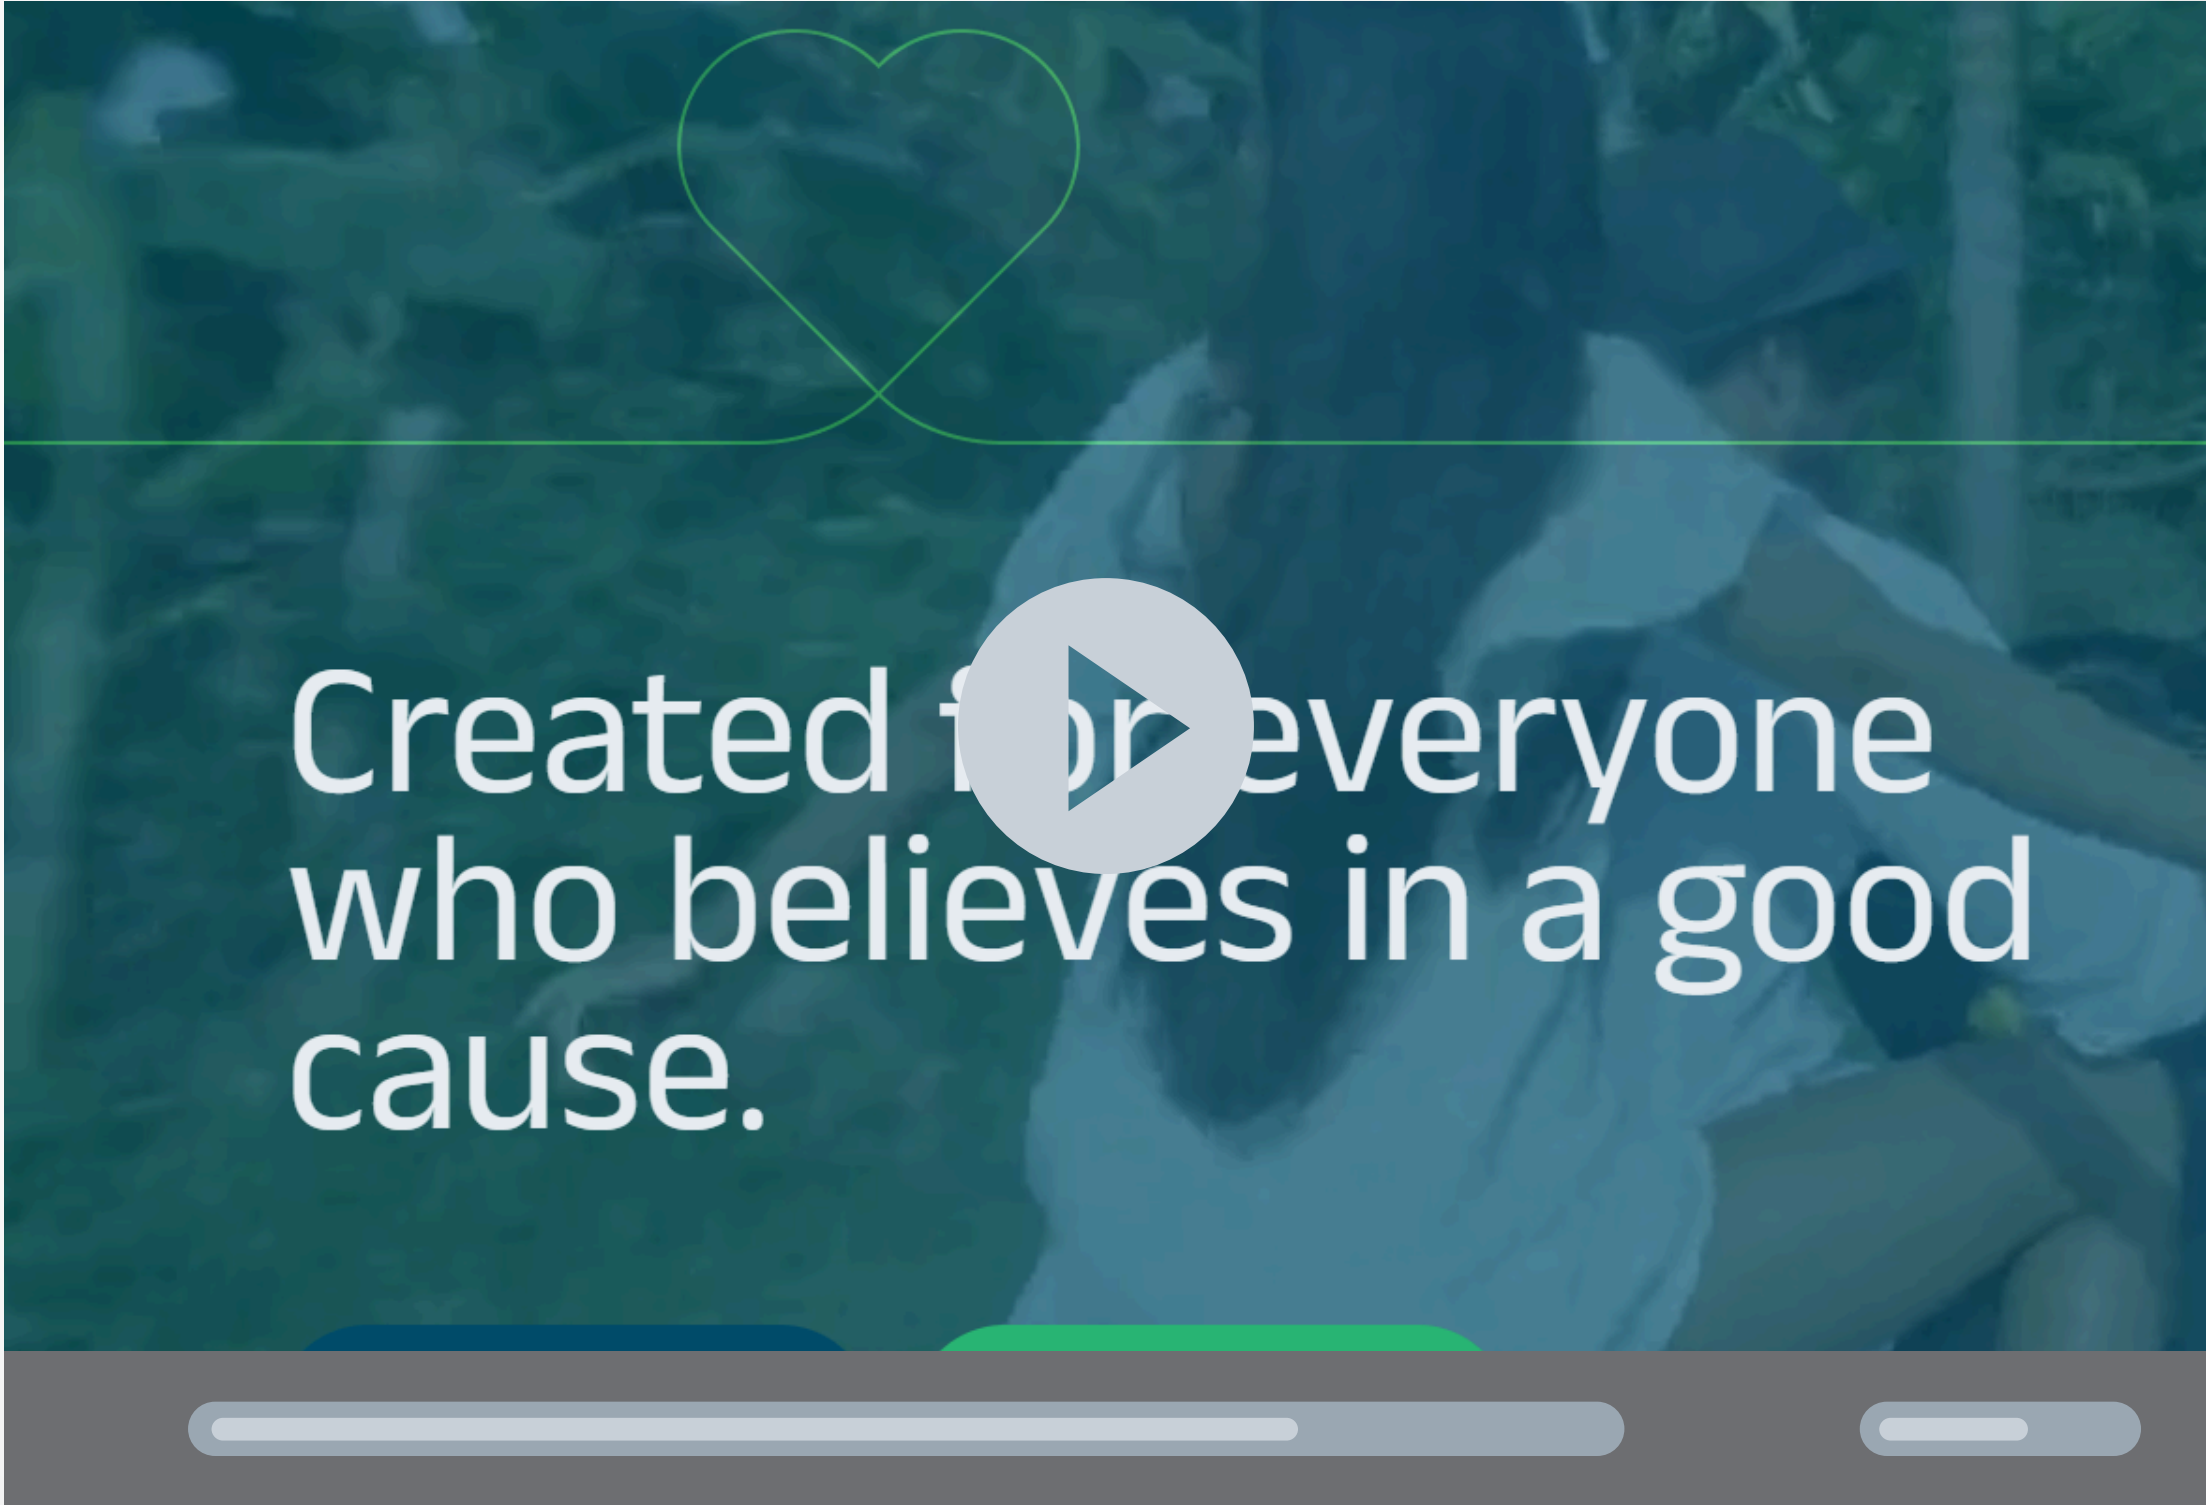

Can be turned off and back on at any time
